

Please allow k-love stations to continue broadcasting in my local community. It is the only station that has programming that I know to be uplifting and g-rated. I know I never have to screen it's content. I get so much more out of listening to secular music on this station than the questionable content of other stations. I find it offensive that Christians have to fight for the reight to listen to secular music, but other stations playing rap, rock, hip-hop, etc, with questionable language and content would have priority. Thank you for your time, Laura Pounds
